Geneva Cavern Mini Setting

Written by Eddie Jonas

An Adventure for AD&D, D&D 5e, Dragonscales & the Lost 77 Worlds

The Geneva Cavern is an ancient large underground cavern ecosystem. There are many unique critters that make their home here including dinosaurs. There is plenty of adventure potential in this unique space.

The idea is to insert this in whatever setting you are using. As it is an underground cavern, it can be inserted into most maps or even on an asteroid, for those enjoying a space adventure. As a game master, you may want to add some fresh spice to your game. This is an easy way to do that.

Available as Soft Cover.
